of the Press. So important was the appreconded-step felt to be in connection with the public safety that most of the foreign residents. not possessing such weapons were about to invest in revolvers for their protection. And after all, the alarm turns out to be porfectly causeless. The cry of "wolf!" has been raised, and the danger was altogether imaginary, so fur, at least, as the night-pass system is concerned. His Excellency has never, we understand; bad the remotest idea of abolishing, curtailing, or altering the night-pass system, and is strongly convinced of the importance of maintaining it intact. He is, moreover, of opinion that the Colony owes its great immunity from serious crime almost entirely to this system. THE Router's tologram published in another column contains little of importance beyond the announcement that the Russians have determined to cross the Danube at Nikopoli, or (as it is better known) Nicopolis. This is a town with a population of some ten thousand, situated in Bulgaria, about fiftysix miles west of Rustchuk. It has a rather imposing appearance owing to its being situated on a range of bills above a bay of the Danube and surrounded by ramparts mounted with cannon. It is further defonced by an ancient castle. These defences are, however, not to be relied upon much, not being adapted, we bolieve, to oppose much resistance to modern artillery. town, generally speaking, is poorly built, but possesses a few large houses and some hand. some mosques. IMPERIAL QUARTO. english and chinese dictionar PUNTI AND MANDARIN. PRONUNCIATION.

at the Daily Press Office, Hongkong. TAOR comprehensiveness and practical service Lesting Work stands unrivalled. All the new words which the Chinese have of late years been compelled to coin to express the numerous obeatain machinery, photography, telegraphy, and a science generally, which the rapid advance of foreign relations has imposed upon them, are here given in extense. Each and every word is fully illustrated and explained, forming exercises for students of a most instructive nature. Both the Court and Punti pronunciations are GRYPE, British ship, Roberts.-Douglas Lapgiven, the accents being carefully marked on the best principle hitherto attained. The typography displays the success of an attempt to in the size of body, thereby effecting a vac previously attained, and dispensing with those vast margins and vacant spaces which have heretofore characterized Chinese publications. For practical purposes the arrangement of to its pages embles a person who understands English to communicate effectively. with natives who understand nothing but Chiindispensable to all Europeans residing in

plains subjects fully with which very few inparties resident in England and interested in China it cannot but be invaluable occasionally. To illustrate the vast scope of the work, the Ohalmers Vocabulary contains about 16,000 and Chinese Dictionary about 100,000, whilst this work contains more than 50,000 English other elementary works as yet published, the student of this difficult language absolutely rehave one general meaning. Of these examples this work contains more than five times as

Many boxes of letters are received at the Post Office not scaled, that is to say the box is fastened with sealing war, but there is no impression of a seal. The attention of boxholders is called to the necessity of onrefully sealing such boxes with some recognisable seal, and of conding a Obitbook or receipt with them. The omission of the latter propartion leaves a doubt as to weather the contents of the box ever reached the Post Office: the omission of the former, as to whether part of them might not have been abstreeted for the sake of the Postage Stamps.
